# THE NEW BOMA STANDARDS; ADOPT THEM OR IGNORE THEM?

*Author(s): Trainor Fairbrook*

Please join us on April 1 for a 30-minute webinar on the new 2010 BOMA standards, providing you with an overview of the new standards and whether you should consider adopting them into your leases. The new BOMA standards provide for two alternate methods of measuring office buildings. Controversy has already arisen as to whether the new method is viable or will be considered by sophisticated tenants.

From the comfort of your office, listen to an overview of the new standards and their opinions on the use of the new provisions in your leases. This webinar assumes that you have experience with the existing BOMA standards.
